High Risk Soils

- Salinity Expression
- Salinity Expression 100m Separation
- Soil Management Area

Other Features

- Major Road
- Railway Network
- Property Boundary
- Local Government Boundary
- Watercourse or Waterbody

DISCLAIMER

The High risk soils map identifies known areas of salinity and dispersive soils including localised salinity expression, extensive areas of salinity that relates to the underlying geology, and soil management areas. There may be areas containing high risk soils that have not been identified and therefore are not shown on the High risk soils map. Areas not identified on the High risk soils map cannot be assumed to be free of high risk soils. In accordance with the Environmental Protection Act 1994 and the General environmental duty, all reasonable and practicable measures must be taken to prevent or minimise environmental harm. All development, therefore, must be designed to suit the soil type in the location it is sited.

NOTE

Refer to online or electronic mapping where layers overlap or labels obstruct the data on the map.

MAP INFORMATION

Based on or contains data sourced from the State Government which gives no warranty in relation to the data (including accuracy, reliability, completeness or suitability) and accepts no liability (including without limitation, liability in negligence) for any loss, damage or costs (including consequential damage) relating to any use of the data.
